A. GENERAL

1.0 Purpose and Objective

This Service Level Agreement (SLA) has been jointly created by The Department of Military and Veterans Affairs (DMVA) and the Department of Information Technology (DIT) to detail the conditions and expectations of our two organizations regarding the delivery of information technology services.

We believe this SLA will help us express our expectations of each other, manage our respective workloads, communicate more effectively and quickly resolve any service problems that may arise. This document can be viewed as a building block that will contribute to a long-term relationship. Accordingly, no changes will be made to this document without the **written** agreement of both organizations. This document will remain in effect until explicitly replaced or terminated.

All current Service Level Agreements (SLA's) and Memorandum's of Understanding (MOU's) will be superceded by this signed document, unless they are specifically referenced in this SLA.

2.0 Scope

DIT will provide the following services at all DMVA locations. These services include application development and maintenance, helpdesk services, voice, desktop and field services, computing services, data and network connectivity services, disaster recovery and business resumption services, information technology and consulting services, IT procurement and IT contract management. The following services are not provided by DIT and therefore are not part of this agreement; **Cell Phones, Pages, PDA's, Telecommunications Support for Facilities and Training Sites that house National Guard Troops.**

3.0 Roles and Responsibilities

DIT shall:

- Be responsible for providing the resources and skills to deliver the agreed-to services identified in the SLA.
- Communicate the methodology for pricing and the process for collecting fees and payments, *to include detailed billing statements.*
- Organize, facilitate and attend meetings in order to meet service objectives and business demands.
- Commit to teamwork and conflict resolution.
- Ensure the needs and concerns of DIT and the Agency are represented.

~~{Insert Agency Name}DMVA~~ shall:

- Assign an individual as the Department SLA Manager.
- Commit to teamwork and conflict resolution.
- Communicate all issues and problems to DIT following the problem management and escalation procedures outlined in this document.
- Communicate with DIT, *in writing*, to ensure that DIT is adequately informed about ~~{Insert Agency Name}DMVA~~ needs, requirements and business directions. The Agency must communicate with DIT immediately if there are changes in program direction. New initiatives must be communicated to DIT so that adequate preparation and procurement time is available to implement new or enhanced services.
- Include appropriate DIT Information Officer (IO) in IT strategic planning activities.

~~{Insert Agency Name}DMVA~~ Ownership of ~~{Insert Agency Name}DMVA~~ Data

~~{Insert Agency Name}DMVA~~ Data is and will remain the property of the ~~{Insert Agency Name}DMVA~~. The DIT in delivering information technology services is acting as the custodian of ~~{Insert Agency Name}DMVA~~ data. The data owner, i.e. ~~{Insert Agency Name}DMVA~~ is responsible for communicating data requirements to the DIT, e.g. access rights, criticality, etc. ~~The DIT will establish and maintain environmental, safety and facility procedures. data security~~

procedures and other safeguards against the destruction, loss, or alteration of ~~[Insert Agency Name]DMVA~~ Data in the possession of the DIT which are no less rigorous than those maintained by the DIT for its own information of a similar nature.

Responsibility for Application and General Controls

Application Controls apply to individual computer application systems and may include such controls as data origin, input controls, processing controls, output controls, application access controls, application interfaces, audit trail controls, and application documentation. Application Controls consist of mechanisms in place over each separate application (computer system) that helps to ensure authorized data is processed completely, accurately, and reliably. ~~[Insert Agency Name]DMVA~~ is and will remain responsible for ensuring application controls are in place and functioning properly within their organization.

General controls provide the business and IT functions with a set of encompassing controls that are shared by several agencies/departments or information system functional units, or support underlying functions that one or more applications rely on. General controls commonly include controls over data center operations, system software (not application software), acquisition and maintenance, physical security, OS (Operating System) level security, application systems development maintenance, and overall IT Department administration. These controls apply to all systems, e.g. mainframe, mini-computer, and end-user computing environments. DIT is and will remain responsible for general controls.

Security

~~[Insert Agency Name]DIT~~ and ~~[Insert Agency Name]DMVA~~ personnel are responsible for complying with DIT IT security policies.

4.0 Contact Information:

The Information Officer will be the primary representative from DIT managing and ensuring service delivery as identified in the SLA.

~~[Insert Name, phone, location, e-mail address of the Information Officer]~~ Gary Blair, Information Officer, Public Protection
517-336-6473, 714 S Harrison Rd., East Lansing, MI 48823
blairg@michigan.gov

~~[Insert Department SLA Manager]~~ COL Daniel N. Rodeck has been identified as the Department's SLA Manager and will be the primary representative for ~~[Insert Agency Name]DMVA~~

Customer Service Center (~~phone-xxx-xxxx, email:abed~~) 517-241-9700 or 1-800-968-2644

The DIT Customer Service Center is available 7:30 am – 5:00 pm Monday through Friday. This Customer Service Center is the point of contact for ~~[Insert Agency Name]~~DMVA service requests and problems.

5.0 SLA Problem Management and Escalation

It is anticipated that the services provided by DIT will be acceptable to the Department. In the event that the Department is dissatisfied with the services provided, the Department SLA manager should contact the DIT IO. The IO will resolve the issue to the Department's satisfaction, within time limits established at the initiation of the escalation of the issue. - If a mutual resolution can not be reached, the issue will be elevated to the Director of the Department of Information Technology.

6.0 SLA Document Change Process

Changes to this agreement may be negotiated based on changing business or service needs or significant variances from service commitments. Requests can be submitted, in writing, to the IO or the Department's SLA Manager, and they will negotiate the changes. The changes must be agreed to by the Directors, or their designees, of both organizations. Requested changes should be dealt with in a timely manner. Depending on the degree of difficulty, changes will be addressed within 30 days of receipt by the IO.

7.0 Maintenance and Distribution of the Agreement

The IO is responsible for maintaining this Agreement and ensuring that changes have been incorporated when appropriate prior to distributions of new versions.

Distribution of copies within the ~~[Insert Agency Name]~~DMVA organization is the responsibility of the Department SLA Manager.

8.0 Billing and Invoicing

The DIT services charges will be based on actual costs, which are deemed fully allowable and appropriately assigned or allocated to respective DIT services as required by OMB Circular A-87. DIT is in a transition period. As a service provider to State of Michigan agencies, the ultimate direction is to move to a fully-rated cost recovery model. Noted

below are cost treatments and charge-back methodologies for DIT services for FY 2003.

Invoices must be paid within 30 days of receipt. If an item is disputed the remaining invoice amount must be paid in full within 30 days of receipt. ~~{Insert Agency Name}~~DMVA must notify Corey Sparks of disputed items within 10 days of receipt of invoice.

DIT Cost & Cost Recovery Treatments FY 2003

Direct Charges: The ~~{Insert Agency Name}~~DMVA will be charged for costs directly associated with the delivery of Information Technology (IT) services. Examples include: direct agency assigned staff and agency specific IT procurement. In some instances there are staff who are working for multiple agencies in a non-rated service. Program managers will provide work distributions based on time reporting data for staff in these roles. Staffing costs will be charged to the ~~{Insert Agency Name}~~DMVA based on distribution percentages. DIT will continue to maintain time statistics. Time statistics will be distributed to each Agency on a monthly basis, or as agreed upon by the Agency and DIT.

Where dedicated staff is assigned, DIT Management will communicate with DMVA Management schedule changes and vacation schedules for associated employees.

Program Administration (PA): Program Administration (which includes divisional, sectional and team administration) expenditures are costs incurred by program management in the delivery of IT services. An example of such cost is the Director of Agency Services. Costs incurred by the Director of Agency Services will be allocated to the ~~{Insert Agency Name}~~DMVA as a function of Agency Services' direct salaries charged by Agency. PA will be allocated to the first-line staff through step-down allocations based on salary dollars.

Rated Services: The ~~{Insert Agency Name}~~DMVA will continue to be charged for rated services such as Telecommunication data and voice networks, Data Center Services, Project Management and Center for Geographic Information Services, etc. Rated services are charged based on usage for the specific service per published rate schedules.

Desktop Services: Desktop Services costs will ultimately be recovered through a rated structure. Initially, however desktop costs will be allocated to the ~~{Insert Agency Name}~~DMVA based on relative percentage of desktops.

$$\frac{\text{Desktop Services Total Costs}}{\text{Total Desktop Count}} \times \frac{\text{Agency Desktop Count}}{\text{Total Desktop Count}} = \text{Agency Charge}$$

Where required, Remedy statistics may be used to aid the DIT in further distribution of desktop costs. (Note: Specific desktop purchases will be charged directly to the ~~{Insert Agency Name}DMVA~~ and not allocated.)

Distributed Processing (DP): Distributed Processing services (local networks, servers, email, mainframe operations productions support, etc.) will be charged to the ~~{Insert Agency Name}DMVA~~ based on direct assignment of staff. DP program administration will be allocated to first-line workers via step-down function based on salary dollars.

Enterprise Portal Costs: Enterprise Portal costs will be allocated to the ~~{Insert Agency Name}DMVA~~ based on a weighted-average of content pages and page views for internet costs.

Rent: DIT recognizes that there may be instances during transition where DIT staff who are servicing multiple agencies may be housed with an area that heretofore had been dedicated to a single agency. DIT will recommend a method for equitable allocation and "true-up" of these costs for treatment beginning with the FY04 billing cycle.

Annual Reconciliation: DIT will conduct an annual reconciliation of charges, or "true-up." This will involve a comparison of billed charges to the actual costs of providing those services. DIT may elect to refund any difference to customers through a final adjustment to billings. However, if differences are within reasonable levels, they may be carried forward as adjustments to future year's charges or rates as provided in OMB Circular A-87.

Meetings: DIT financial staff, in coordination with the ~~{Insert Agency Name}DMVA's~~ Information Officer, will meet on a regular basis with ~~{Insert Agency Name}DMVA~~ staff to review DIT invoices (invoices typically presented on a monthly basis) and identify and resolve any billing adjustments, omissions and related issues that may be identified.

Spending Plan: DIT financial staff will prepare and distribute a spending plan each month that annualizes expenditures, year-to-date, against the Agency Inter Departmental Grant (IDG). DIT financial staff, in coordination with the ~~{Insert Agency Name}DMVA's~~ IO, will meet on a regular basis with ~~{Insert Agency Name}DMVA~~ staff to review the spending plan, identify funding shortages, and jointly prepare an action plan to spend within available resources.

9.0 Audit Clause

As part of this SLA, the ~~{Insert Agency Name}DMVA~~ and DIT agree to this audit clause which provides that financial records, documents, data, accounting procedures and practices, programs, projects, information systems, or any other items of the service provided, deemed relevant to the SLA by ~~{Insert Agency Name}DMVA~~ and DIT, are subject to examination by the appropriate ~~{Insert Agency Name}DMVA~~ and DIT representatives. The ~~{Insert Agency Name}DMVA~~ and DIT will, and will cause its subcontractors and suppliers to, provide to the ~~{Insert Agency Name}DMVA~~ and DIT (and internal and external auditors, inspectors, regulators and other representatives that the ~~{Insert Agency Name}DMVA~~ and DIT may designate from time to time) access at reasonable hours to the ~~{Insert Agency Name}DMVA~~ and DIT personnel, to the facilities at or from which services are then being provided and to the ~~{Insert Agency Name}DMVA~~ and DIT records and other pertinent information, all to the extent relevant to the services and ~~{Insert Agency Name}DMVA~~ DIT's obligation. Such access will be provided for the purpose of performing audits and inspections. The ~~{Insert Agency Name}DMVA~~ and DIT will provide any reasonable assistance requested by either party or their designee in conducting any such audit, including installing and operating audit software.

Following an audit, the ~~{Insert Agency Name}DMVA~~ and DIT will conduct an exit conference with ~~{Insert Agency Name}DMVA~~ and DIT representatives. The ~~{Insert Agency Name}DMVA~~ and DIT will meet to review each audit report promptly after the issuance thereof and the ~~{Insert Agency Name}DMVA~~ and DIT will respond to each audit report in writing within thirty (30) days from receipt of such report, unless a shorter response time is specified in such report. The ~~{Insert Agency Name}DMVA~~ and DIT will develop and agree upon an action plan to promptly address and resolve any deficiencies, concerns, and/or recommendations in such audit report and the ~~{Insert Agency Name}DMVA~~ and DIT will undertake remedial action in accordance with such action plan and the dates specified therein.

All personnel external to DMVA will be required to follow established DMVA policies. DIT Supervision is encouraged to visit each facility to acquaint themselves with the business processes of DMVA.

10.0 Service Reviews

Quarterly (or as needed) reviews will be conducted with the Department's SLA Manager to assess service effectiveness, address service problems, and evaluate service delivery in light of business needs and available resources. Particular attention will be paid to notable deviations from commitments.

As a basis for the review, the IO and Department SLA Manager will collaborate in collecting, analyzing and reporting service data associated with the SLA. A report, written by DIT, describing project statuses, issues addressed, decisions made and actions taken will be published within five (5) days of the review meeting.

This review will also include advice from DIT on technology options that have become available that could improve the overall level of service. This review will also serve as an opportunity to identify improvements in performance.

B. AGENCY SUPPORT SERVICES

1.0 New Systems Development

New system development is work that leads to the creation of new systems/applications. Application development requests will be submitted through the process developed by the [Insert Agency Name]DMVA and the IO. Agency responsibilities will minimally include:

Development of the Project Feasibility (See Attachment A) document, which shall describe the general business problem being solved. This document must include Agency authorized signatures and funding source. Prior to proceeding with the project, the Agency shall be responsible for developing the project charter, with assistance from DIT. This document must identify:

- Project scope. (Attachment B)
- DIT and Agency Roles and responsibilities. (Attachment C)
- Project management and project ownership.

Where DIT resource (staffing) conflicts exist, the AgencyDMVA must re-prioritize current projects and current maintenance efforts to accommodate new system development.

2.0 Application Maintenance and Support

Enhancement and maintenance requests will be submitted through the process developed by the [Insert Agency Name] and the IO. Application maintenance and support includes the following:

Enhancement sub-divided as follows:

- **Major Enhancement:** involves significant new requirements, but does not alter the overall makeup of an existing solution. This may

entail adding, changing or deleting functions for the existing solution. Major enhancements will usually cause an impact to the business, organization or architecture and may require significant cost, effort, and time to complete. Examples may include migration to a new application platform, adding new interfaces, or re-designing a database.

- **Minor Enhancements:** involves adding new requirements against an existing solution, but have minimal impact on the business, organization, or architecture. Examples may include updates to data tables, updating a field on an HTML view, or updating a module that was originally changed via an emergency fix.

Maintenance sub-divided as follows:

- **Corrective Maintenance:** includes work that is initially spawned by a problem incident report and is generally referred to as a "fix." Involves changes made to application code in support of new or changed system software. Cost and effort are relatively low. This work may be initiated to provide a complete fix after an emergency fix was performed.
- **Emergency Fix:** defined as the occurrence of a problem that must be addressed immediately, such as the disruption of a system or application.
 - Urgent* -- life and death situations.
 - High* -- public impact, significantly impacts a large number of users, or inability to meet deadlines for statutory payments.
 - Medium* -- all other situations that have impact on users.
- **Perfective Maintenance:** involves work that is initiated in order to avert foreseeable problems, improve performance, quality, reliability, efficiency, usability, or maintainability of an installed solution. An example may be performance tuning.

DIT will be responsible for on-going system maintenance, unless otherwise outsourced to a vendor, for the duration of this agreement. Should system maintenance obligations impact the delivery of new systems, or resources not available within the existing staffing structure, the Agency/DMVA will be responsible for prioritizing maintenance efforts.

Support: Work related to the production application such as end user assistance, routine tasks or monitoring of the production application. Examples may include on-call support, adding or changing user access to the application, production scheduling, and responding to end user questions or emails.

C. CRITICAL APPLICATIONS

The following applications are considered critical to the agency, and detailed service level agreements are included in **Appendix A**:

{List Critical Applications}Grand Rapids:

_____ AccuMax
 _____ QS1
 _____ State Veterans Program
 _____ GeriMenu
 _____ Tracey Time
 _____ Member Program

_____ Marquette:

_____ Aquity
 _____ Census
 _____ Appointments
 _____ Finance
 _____ Kitchen Menus
 _____ Infection Control
 _____ Medical Labs
 _____ Medicare
 _____ Pharmacy
 _____ Reports and Forms
 _____ TimeClock
 _____ MDI
 _____ QS1

D. DISTRIBUTED PROCESSING OPERATIONS

1.0 Overview

The Distributed Processing Operations (DPO) Division within the DIT is responsible for the planning, design, engineering and operations of all local area networks for the State of Michigan. DPO also offers server and application hosting services, e-mail service, file and print services, operating system support, maintenance support, software and hardware technology refreshment services in a variety of different facilities in a distributed environment.

DPO services are typically provided on a 5 X 12 basis; however, the Agency has the option to extend coverage via an on-call service.

DPO also offers mainframe job scheduling, operations and data entry services.

2.0 DPO Services

DPO provides the following types of services to Agencies:

Facilities Management	Network Management
Server Procurement	Job Scheduling/Execution
Server Software Installation	Maintenance Agreements (SW & HW)
Asset/Configuration Management	Server / HW Capacity Planning
Server Installation/Setup	Service Request Management
Server Backup/Recovery	Software Problem Management/Patch Process
Server Documentation	Print Services
Server Security	Operations
	Metrics/Utilization Reporting
User Profile Management	Application Server Support
Performance Tuning	Server Software Distribution
Server Monitoring and Corrective Action	Change Control
Performance Tuning	Software Version Control
Server Monitoring and Corrective Action	

Schedules of upgrades and outages will be given to DMVA at least one week prior to work being done.

3.0 DPO Monthly Costs

DPO charges for FY03 are costs directly associated with the delivery of the services listed above. These charges include three types of costs: Payroll, Program Administration, and Support Costs.

- **Payroll** consists of actual payroll charges for the pay periods ending during the invoice month. DPO staff is charged to an agency as dedicated to the agency, allocated to the agency, or based on a time distribution.
- **Dedicated:** Costs of DPO employees working full-time for a single agency. Where dedicated staff is assigned, DIT Management will communicate with DMVA Management schedule changes and vacation schedules for associated employees. DIT Supervision is encouraged to visit each DMVA facility to acquaint themselves with the business processes.

- **Allocated:** Costs of supervisors and managers are allocated based on salary costs of employees in their reporting organization.
- **Time Distribution:** Some DPO employees provide services to multiple agencies. For these employees, their costs are distributed as a percentage of time worked for each agency.
- **Program Administration (PA)** expenditures are costs incurred by program management in the delivery of DPO services. An example of such cost is the Director of Distributed Processing Operations. Costs incurred by the Director of Distributed Processing Operations are allocated to agencies as a function of Agency Services' direct salaries.
- **Support** costs are expenditures such as travel, telephones, pagers, copier rental, office supplies, and other CSS&M related to the staff in the DPO organization.

E. IT PROCUREMENT

1.0 Overview

Contract & Procurement Services provides agency-specific and enterprise-wide procurement and contract management services for IT commodities and services. MAIN processing activities, vendor interaction, and State approval/reporting requirements are handled by DIT Contract & Procurement Services.

2.0 Contract Management Services

DIT Contract Management Services is responsible for processing all IT related contractual service requests, and ensures that the services provided meet contract specifications. In serving these IT needs, DIT Contract Management Services include the following:

- Assist Agency in developing, renewing, and re-bundling IT contracts.
- Work with Agency and project managers in identifying IT needs and developing statements of work.
- Coordinate with DMB to determine most appropriate contract vehicle to obtain services.

- Develop contract language for Request for Proposal, Invitation to Bid, and Sole Source contracts.
- Work with Agency procurement and personnel staff to obtain Department of Civil Service approval, via CS-138, if needed.
- Participate in pre-bid meetings, oral presentations, and joint evaluation committee process and vendor selection.
- Review contractor's detailed work plan to ensure it will result in meeting the objectives and tasks stated in the contract.
- Act as liaison between Agency and Contractor in order to mutual understanding of the respective roles and responsibilities of the contractor and the Agency.
- Prepare contract portfolio and status reports to share with management staff regarding contract management and activity.
- Monitor contracts with existing vendors and make recommendations on extensions and renewals using uniform analysis.
- Manage contract change requests.
- Monitor financial data for each contract to ensure that contract is on budget.
- Monitor all contract activity to ensure compliance with contractual obligations and DIT strategic direction.
- Leverage resources and create cost savings by establishing contracts using a best-practice, best-price, and best-value mindset.
- Promote proactive management of the IT contract portfolio through valued partnership and foster an enterprise-wide perspective.
- Coordinate funding approvals.
- Adhere to Executive Directives/Executive Orders, DIT and Agency-specific requirements in processing IT contractual service requests.
- Process approved agency contractual service requests in a timely and efficient manner.

3.0 Procurement Services

DIT Procurement Services covers the purchase of all non-delegated IT commodities and services for State agencies. (Second paragraph moved)

The DIT Procurement Services Section performs all MAIN-related functions for IT procurements. These include requisitions, purchase

orders, change orders, receivers, and cancellations. DIT Procurement Services will issue Agency-specific procurement requisitions in a designated MAIN ADPICS department number and route those documents for view and approval by the Agency, based on approval path information provided by the Agency. DIT Procurement Services will notify end users of request status throughout the procurement.

In serving the IT procurement needs of the Agency, DIT Procurement Services will:

- Adhere to Agency-specified approval requirements for IT purchases;
- Provide a variety of methods for Agencies to request the purchase of desktop commodities, including telephone requests, e-mail, fax, ID-mail requests;
- Process approved Agency procurement requests through appropriate DIT approvers in a timely and efficient manner;
- Check published on-hand stock status for items that can be redeployed free of charge before procuring new items using Agency funds;
- Procure commodities that meet published enterprise standards;
- Use a variety of procurement methods, including the MAIN system and procurement cards, to purchase items at the most favorable cost and value;
- Notify the Agency of procurement request status;
- If requested, use Agency-specific coding in selected fields of MAIN coding blocks to assist the Agency in reconciling its monthly invoice;
- Establish and maintain a MAIN ADPICS department approval path to route Agency-specific purchases for approval and viewing by Agency staff;
- Work with the Depot to perform the receiving function for commodity purchases;
- Adhere to State Executive Directives and instructional memoranda regarding the approval, processing, and reporting of IT commodities;
- Expedite orders as quickly as administratively possible for urgent Agency requests;

- Coordinate procurement efforts with those of DIT Infrastructure Services, Agency Services, and Administrative Services to streamline receipt, delivery, and billing for commodities;
- Provide procurement contact names and instructional media to Agency staff regarding DIT procurement methods. If requested, meet with and train Agency staff on DIT procurement processes;
- Work cooperatively with DIT Infrastructure Services to maintain warranty and maintenance agreements for software and hardware serving the Agency;
- Strive to lower Agency costs for licensing and maintenance purchases by combining procurements for volume discounts;
- Process assigned invoices in a timely manner and work proactively with DMB Accounts Payable staff to ensure timely, accurate payment of vendor invoices.

The Agency will be responsible to:

- Enter Account Code (AC3) information into requisitions in the approval path, if the Agency chooses to request AC3 coding for its IT purchases;
- For IT desktop commodity purchases, supply information identifying the end user's name, phone number, and physical location to assist in notification, delivery, installation, and inventory tracking;
- Provide Agency-specific ADPICS department number and level number for inclusion in the DIT approval path;
- Provide DIT Procurement with current information on Agency-designated signatories and approvers for DIT-0015 (Procurement Request) documents and Client Service Center Procurement requests;
- Indicate whether funding for each procurement request is included in the IDG;
- Comply with the requirements of the End User Computing freeze on desktop commodities by providing a business case for any desktop commodity request that includes some portion of general fund monies.

Charges to the Agency for Procurement Staff will be based on the percentage of transactions processed for the Agency by its designated procurement liaison(s)

and related percentage of the supervisor and overhead costs. Remedy statistics may be used to calculate number of transactions processed for the Agency.

F. SECURITY SERVICES

1.0 Security Services Overview

Security Services cover the development, maintenance, implementation, and enforcement of security-related policies and procedures for State Government IT resources.

It also includes incident management, monitoring, and interaction with non-State of Michigan security entities to insure that the State's IT infrastructure is safe from entities outside State Government as well as within State Government.

2.0 Scope

- Development of security-related policy and procedures.
- Coordination, implementation, and enforcement of all related security policies.
- Monitoring of security processes.

3.0 Security Services

Security Awareness and Assessment

Essential Base Services:

Development of Security Guidelines and Standards

1. Development of guidelines and standards to meet state and federal security obligations and needs.
2. Coordination of DIT Security agreement processes with agencies.
3. Provide security-related tools, such as training material, etc.
4. Research new security technologies and make recommendations for new processes.

Premium Services:

1. Coordination of Security with agencies, including awareness promotion: Work with agencies to promote security awareness.
2. Enterprise Risk Assessment: Conduct enterprise-wide Rapid Risk Assessment.
3. Assessment & Management of Application Risk:
 - A. Assessment of application risk: Assist agencies in evaluating degree of security-related risk.
 - B. Development of mitigation plans: Provide assistance to customers toward development of mitigation plans to address identified risks.

Passive Monitoring of IT Security Environment

Essential Base Service:

Monitoring of State Firewalls

1. Provide oversight responsibility for the security of the State's infrastructure.
2. Provide final approval on firewall rule changes in accordance with State Standards and guidelines.

Provide Security Alert Services

1. Monitor, evaluate and publish industry security events and vulnerabilities to Agencies.
2. Provide network intrusion detection.
3. Monitor security breaches and provide information to agencies as warranted.

Hardware Security Scanning Services

1. Coordinate scanning of systems within SOM for possible vulnerabilities.
2. Provide recommendations to resolve known vulnerabilities.

Virus Protection

1. Coordination of virus protection, detection and suppression at the PC, server and network level.

General Security Monitoring

1. Provide reports to agencies on security violations as well as policy infractions.
2. Provide IDS services on DIT supported platforms.
3. Coordinating application of federal security programs, such as Homeland Security (focused on "all threats" approach).

Active Monitoring of IT Security Environment

Essential Base Service:

Perform IT Risk Assessment Services

1. Perform risk assessment of DIT infrastructure facilities in accordance with State policy and standards.
2. Perform on-demand risk assessment service, as needed within DIT for new or changing infrastructure facilities.
3. Document risk assessments for management review and response.

Audits of Access Privileges

1. Audit access codes and usage on platforms within DIT based on Security policies and standards.
2. Provide information for coordination with customers on customer access rights and privileges.
3. Assist customers with agency audits relating to IT platforms/applications. This assistance may involve IRS audits, Auditor General Audits, etc.

Premium Services:

1. Ethical Hacking - Conduct ethical hacking against DIT platform resources to assist in determining level of risk for intrusion, firewall protection and make recommendations on remediation strategies.

2. User Monitoring - On-demand monitoring of users. In specific circumstances, it may be necessary to monitor specific users to address suspected illicit or fraudulent use of IT resources.
3. Health Information Portability Protection Act (HIPPA) - Ensure compliance with HIPPA regulations.
4. Security Accreditation of Computer Systems - Facilitate security accreditation and certification of computer systems.
5. Formal Security Training / Awareness.
6. Homeland Security Incident Coordination Issues/Response.

Coordination of Physical Security for DIT Facilities

Essential Base Service:

1. Provide oversight responsibility for the security of the State's physical IT infrastructure.

4.0 Disaster Recovery Services Overview

The Disaster Recovery and Emergency Management Services addresses DIT's responsibility regarding planning, developing and executing disaster recovery capabilities.

These services also address offering assistance to the agency toward development of their business resumption plan responsibility. DIT can leverage its disaster recovery planning expertise to provide assistance to its plans and processes. While both the development and execution of business resumption is clearly an agency responsibility, DIT will assist customers in dealing with this responsibility.

5.0 Scope

- Assist in the creation of disaster recovery plans and processes and creation and maintenance of a disaster recovery hardware environment.
- Bring hardware and systems back online in the event of a disaster for critical application infrastructure.
- Assist toward development of business resumption plans and processes.

6.0 Disaster Recovery Services

Development and Maintenance of Disaster Recovery Plan

Essential Base Service:

Maintenance of Disaster Recovery Plan - For critical business and DIT processes, creation of a disaster recovery plan covering:

1. Maintenance of existing disaster recovery plans.
2. Distribution of the disaster recovery plan.

Premium Services:

A. Development of Disaster Recovery Plans - For critical business and DIT processes, creation of a disaster recovery plan covering:

1. Development of disaster recovery plans specific to each platform/process.
2. Distribution of the disaster recovery plan.

Testing of Disaster Recovery Plan

Essential Base Service:

Testing of Disaster Recovery Plan - Coordination of testing process with DIT infrastructure support and customer as required. This includes:

1. Testing of applications, network availability and output.
2. Ensuring that adequate Disaster Recovery testing is accomplished to meet customers' business requirements.

Premium Services:

A. "Table-Top" Testing - Panel review of Disaster Recovery Plan to verify plan validity (content, information, sequence, etc.).

B. Simulation Testing - Full-blown simulation of Disaster Recovery Plan execution to verify validity, completeness and effectiveness.

Execution of Disaster Recovery Plan

Essential Base Service: None.

Premium Services:

- A. Declaration of an EMERGENCY - Based on customer need and circumstance, DIT is responsible for the declaration of an emergency.
 1. Provides 'over and above' normal business response for the specific systems or applications for which the emergency has been declared.
 2. Escalation to 7 X 24 coverage from on-call individuals.
- B. Declaration of a DISASTER - Based on customer need and circumstance, DIT is responsible for the declaration of a disaster. [NEED TO SUMMARIZE CIRCUMSTANCES THAT WOULD CREATE A DISASTER AS WELL AS DEFINE DISASTER]
- C. Execution of Disaster Recovery Plans and Processes - Carry out efforts necessary to implement a Disaster Recovery effort based on the requirements defined in the Disaster Recovery plan to ensure that the DIT Services meets pre-defined Agency Business Resumption Process requirements (may include the desktop, telecom, and distributed server environments).
 1. Re-establishment of infrastructure required to support business resumption.
 2. Re-establishment of data access.

Assistance toward Development of Business Resumption Plans and Processes**Essential Base Service:**

- Assistance to agencies toward development of their business resumption plans and processes.
- Coordination of business resumption planning process with DIT Infrastructure support, Agency Services and Customer as required.
- Ensure that all infrastructure issues identified in the Business Resumption Process as being critical are involved in the development process (may include the desktop, telecom, and distributed server environments).

Other Disaster Recovery Services

Essential Base Service:

All other disaster recovery and assistance toward development of business resumption processes.

G. ENTERPRISE APPLICATION SERVICES**1.0 Overview**

Enterprise Application Services provides application development and support for technical applications and services impacting several agencies and the enterprise (all agencies), including Human Resource Management Network (HRMN), DCDS, ADPICS, RSTARS, Michigan.gov, e-stores, Vignette, and Senior Project Management.

2.0 Development and Enhancement Services

Development and enhancement services to the Human Resource Management and Finance applications including HRMN and DCDS are prioritized by the Civil Service Department. MAIN (ADPICS and RSTARS) services are prioritized by the Office of Financial Management.

New Development projects and enhancements to enterprise or multiple agency solutions including Michigan.gov applications are provided upon request by agencies.

Billing and Funding

HRMN and DCDS are funded by the Civil Service Department; MAIN is funded by the Office of Financial Management of the Department of Management and Budget. Development and enhancement services are billed based on the scope of work requested and funding available by the requesting agency.

The billing rate will be an hourly rate for staff based on expertise:

- Project Manager
- Jr. Project Manager/Special Projects Lead
- Sr. Technical Analyst
- Analyst/CMA Specialist

Obtaining Services

A Memorandum of Understanding identifying the rates, work to be performed, responsibilities and funding source and approval will be developed and signed by the Information Officer, the Director of Enterprise Application Services or designee, and the Requestor for each project.

3.0 Michigan.gov

The Michigan.gov portal group provides hosting services including the production server environment and support at a 99.9% availability, and a test server, licenses and support.

Support Services for Michigan.gov include:

- Formal training and expertise in Vignette to all end users.
- Technical expertise in Vignette, Surfaid and Inktomi for all technical resources.
- Graphical User Interface Michigan.gov Standard support (banner and graphics).
- State of Michigan web application monitoring and review for consistency in security, privacy, look and feel, usability.
- Routine and on-request statistical reports.
- Web user interface design expertise and support of the user interface look and feel of the portal.
- Vignette Application maintenance and small enhancements.
- Maintain the contact Michigan e-mail box and either answer the e-mails or redirect them to the agency or office that can best reply to the query.
- Support Governor's Executive Office and Communication Division with ongoing support for the Michigan.gov home page.

Billing and Funding:

Michigan.gov Portal charges must support entirely the cost of the production and test hosting environments (now 88% of the cost) and the support services staff (now 12% of the cost). Total estimated annual expenses for the Michigan.gov portal is \$4,081,000 distributed as follows:

Production and test hosting charges:	\$3,586,000
Support Services Staff:	\$ 495,000

Total estimated charges for ~~{Insert Agency Name}~~DMVA for October 1, 2002 through September 30, 2003 are ~~{Insert appropriate amount}~~\$46812.96

Agency charges are based on two factors – each weighted at 50%. These factors will be reviewed and adjusted annually:

- Content count in Michigan.gov Database on 10/25/02 are representative of the cost of those servers, redundancy and support and the Vignette application.
- Page Views (end user traffic) 9/1/02 through 9/30/02 are representative of the cost of servers and support for Michigan.gov response time, availability and redundancy.

Charges are not based on the number of websites per agency, the number of authors, editors or publishers, or the number of training or support services.

Obtaining Services:

Enterprise Application Services supports Michigan.gov customers in several different ways:

- Content Management Administrator (CMA) Training is provided on a regular schedule or, if needed, special training can be coordinated to ensure that agencies have personnel capable of maintaining the agencies' web sites with current information. Training can be scheduled by going to <http://w3.michigan.gov/emichigan> clicking on CMA and then Training.
- Assistance on CMA problems.
- Requests for URL redirects.
- Maintain the contact Michigan e-mail box and either answer the e-mails or redirect them to the agency or office that can best reply to the query.

For assistance and any of these items, send a GroupWise e-mail to DIT-EAMS-Web. For immediate assistance from 8:00 AM to 5:00 PM, you can page a CMA expert by calling 341-0999 and leaving your phone number.

Senior Project Manager Services:

The Senior Project Manager is responsible for the successful on-time, within budget and scope, delivery of large (\$5,000,000+), complex and strategic State of Michigan projects. They are seasoned and experienced project managers responsible for successful delivery along with providing mentoring and development of Project Management as a discipline within the State of Michigan.

The billing rate for senior project managers is \$95 per hour for fiscal year 2003.

Obtaining Services:

Contact your IO or Teresa Douglass at 517-241-5779.

H. DESKTOP SERVICES

1.0 Overview

This section details the services associated with the availability of 'ready-to-use' workstations, including standard or advanced workstations as well as associated peripherals, standard software and applications.

It also covers the activities required to ensure that the workstations, peripherals, software and applications provided are properly supported through their entire lifecycle.

2.0 Roles and Responsibilities

Desktop Services include:

- Availability of workstation & standard software, including standard configuration, software and basic office productivity and State of Michigan software and applications;
- Availability of non-standard software, in answer to specific agency, position or in some case individual needs;
- Model Office service, which ensures that any new application, software or hardware is 100% compatible with existing standards & equipment;
- Moves, Adds and Changes service, which deals with the installations, moving and/or removal of workstations and peripherals;
- Peripheral support, covers the on-site support for standard peripheral equipment;
- Kiosk support, similar to peripheral support but tailored specifically to the kiosks used by the agencies to provide services across the state.
- Life Cycle Planning, implementation of a program to provide cyclic replacement of systems.

3.0 Client Service Center

As its name implies, Client Service Center essentially provides a portal to all DIT-related service areas via an Enterprise and Centralized Help Desk.

The Client Service Center covers the following:

- Single point of contact for any form of user support: (to obtain 'break & fix' support, to obtain information about DIT services, to procure new services from DIT such as applications hosting, etc.);
- Tier 1 user support with a stated goal of resolving the majority of support requests during the initial call ("on the spot");
- Tier 2 user support, when applicable, by drawing on other DIT services or Agency programs for final resolution of the issue.

I. CENTER FOR GEOGRAPHIC INFORMATION (CGI)

1.0 Overview

The Center for Geographic Information (CGI) provides leadership, technical expertise, and policy for the development, use, dissemination, promotion and sharing of the state's geographic resources. Charges for CGI fall into two (2) categories: direct agency charges and services charged on an hourly basis.

2.0 Services

New development projects and enhancements to enterprise or multiple agency solutions are provided upon request by agencies. These services are billed based on the scope of work requested and funding available by the requesting agency. A Memorandum of Understanding identifying the rates, work to be performed, responsibilities and funding source and approval will be developed and signed by the IO, the Director of the CGI, and the requesting agency. The billing rate will be an hourly rate for staff as follows:

Senior Staff:	\$75 per hour
Junior Staff:	\$60 per hour
Support Staff:	\$35 per hour

Selected Services Include:

Internet Mapping Services

Thinking and working geographically provides the advantages of using maps for decision support. Internet Mapping Services provide web tools to create maps, integrate information, visualize scenarios, present powerful ideas, and develop effective solutions. Geographic Information Systems (GIS) on the Internet provides a much more dynamic tool than a static map display. Web-enabled GIS delivers interactive query capabilities such as

- Searching for specific site locations
- Displaying and viewing multiple data sets
- Conducting queries for specialized analysis
- Retrieving specialized data services

The CGI provides web-specific data development and management services targeting cartographic design and map rendering technologies; Internet Mapping Application development using pre-developed functionality or meeting new, agency-specific requirements; and IMS hosting services that include G-IT hardware and software maintenance with application versioning upgrades available.

3.0 Project Management

Geographic Information Technology (G-IT) encompasses an understanding of spatial data, cartographic expertise, a specifically targeted family of software and its supporting architecture. Since 80% of State government information has a spatial component, the CGI offers agencies its G-IT expertise for reviewing proposals containing a geographic component and continuing project management services to ensure successful vendor delivery of G-IT requirements.

G-IT User Support

The CGI is committed to supporting and enabling Geographic Information software and equipment users. Both formal and informal assistance and training is available for Geographic Information off-the-shelf software, G-IT equipment such as GPS units, and user training for developed applications. Cartography-related services include custom mapping, development of both standard and custom symbol sets, and standard mapping templates and layers. CGI also provides GIS analysis services tailored to meet agency needs or assists agencies in developing and implementing their own GIS analysis.

Spatial Data Management

The CGI realizes the growing need for managing the ever-increasing volume of State geographic data and offers services to develop data standards for geospatial metadata, locational referencing (examples include address, Public Land Survey System, linear referencing systems, digital orthophotography, Global Positioning Systems [GPS] and other referencing systems), and web portal standards for the Michigan Geographic Data Library. Standards are designed to leverage data integration and sharing among State agencies. Assistance is available for using, administering, and optimizing SDE (Spatial Data Engine) for data loading, data access, and increased performance. Modeling and design services provide yet another avenue to improve data access and availability.

Product Development, Data Development and Data Integration

CGI provides the following services, including

- 1) Standard and custom map products;
- 2) Large-format printing for press conferences, court exhibits, and presentations;
- 3) Database queries and tabular report compilation that reference geospatial data;
- 4) Address (and other locational data) cleansing and address matching/geocoding services;
- 5) Geospatial and related data conversion and migration;
- 6) Custom geographic data development;
- 7) Referencing system and map projection conversions; and
- 8) Two-way data integration between the Michigan Geographic Framework and various business data sources.

CGI also coordinates digital imagery acquisition and development. The CGI administers the State's geographic information web portal including maintenance of the Michigan Geographic Data Library providing access to several State agency-sponsored datasets.

Michigan Geographic Framework

CGI serves as administrator of the "Michigan Geographic Framework". The Geographic Framework is a standardized infrastructure on which all GIS users of 1:12,000 scale map data can build their applications. CGI serves state, regional, county, and local government agencies, private businesses, and the general public. CGI provides technical assistance and consultation services to Michigan's GIS user community.

If appropriate, {Insert Agency name}DMVA is a one-time review for FVO's and has committed {insert dollar amount}.

Service Request Process

Contact your IO or Eric Swanson at 517-373-7910-IO.

J. DATA CENTER OPERATIONS

1.0 Overview

Data and Application Hosting is the ability to provide mainframe/server facilities, Operating System support, maintenance and operational monitoring of customer data and applications.

2.0 Data and Application Hosting

Data and application hosting can be performed either in a centralized or distributed environment, depending on the criticality of the data or applications hosted:

- Centralized hosting in a 7x24x365 data center is provided for data and those applications requiring high availability and/or a need for disaster recovery capabilities. It can also be preferred when a selected application resides on a mainframe or server supported by the data center.

K. TELECOMMUNICATIONS

1.0 Overview

Telecommunications involves traditional voice (telephony) and data network backbone connectivity between State of Michigan work locations.

Voice Services addresses all services related to telephony, from basic office and cellular telephony to the design and deployment of elaborate Interactive Voice Response systems (IVR), Enhanced Call Processing (ECP), or Call Centers.

The breadth of Voice Services offered depends directly on the degree of involvement that DIT has in its delivery, i.e. whether or not the delivery facilities are managed by DIT rather than by an external service provider.

2.0 Service Levels

This translates into three (3) different levels in the breadth of Voice Services that are available to customers:

- For most central locations, or locations with a strong concentration of State of Michigan operations (specific buildings within the **Lansing, Saginaw, Grand Rapids** and **Detroit** areas), DIT manages the voice installations and is accordingly able to offer its full breadth of Voice Services.
- For other locations with significant population or concentration of State of Michigan operations (specific buildings within **Flint, Jackson** and **Kalamazoo** areas), DIT is able to offer a limited breadth of Voice Services.
 - For all other locations, the role of DIT is currently limited to negotiating agreements with service providers to deliver the services on behalf of DIT.

Data & Network Connectivity covers the connectivity of users to standard State of Michigan data sources and applications such as data center applications, distributed applications and external partners.

The Data & Network Connectivity Services are divided into the following services:

- Connection of a local network to the State of Michigan “backbone,” which provides all users of this local network with access to the different data sources described above;
- Different remote connectivity modes, through which users working remotely are able to access their normal data resources;
- Different network services such as dedicated connectivity, connection to external partners, etc.

Appendix A

System Description

The purpose of this System is to provide

1) Maintain Current System

The following Services are required by DIT to maintain System integrity and the current level of service:

1-a. Maintain Current Functionality

DIT will maintain the System functions in place as of the effective date of this SLA. This service ensures the correct operation of the System. DIT will notify the customer that a System change or System maintenance schedules are ready for implementation based upon the customer's time frame.

Major Functional Activities:

-
-

Processing Modes:

-
-

On-line Inputs:

-

Processing Inputs:

-
-

Processing Outputs:

-

Reports:

Daily: (x)

Appendix A

-

Weekly: (x)

-

-

1-b. Contingency Management and System Recovery

DIT is responsible for providing a backup and recovery method for this application based on the following customer requirements:

1-c. Problem Resolution

DIT will provide xx hour per day, xxx days per year abend resolution; resolution of data integrity problems will be communicated by DIT to the Agency if any other deliverable will be affected.

Response time measure:

Abends–

Report delivery–

System performance

1-d. Holiday Processing

DIT will make changes to enable the System to continue with current functions while adjusting to the Agency holiday work schedule.

1-e. Year Changes

Not Included (N/I) - Any changes requested or required to the system must follow the normal development process.

1-f. Change Control

Not Included (N/I) - Any changes requested or required to the system must follow the normal development process.

Appendix A**2) Application Support Services**

Application Development and Maintenance Services cover the entire application lifecycle from a total cost of ownership perspective.

This service offering also addresses the opportunity evaluations necessary to decide whether or not an application development project is warranted.

Application Support**2-a. Application Operations**

DIT will provide System support for the current on-line and batch operations.

4-b. Clerical Services

N/I

4-c. Data Entry Services

N/I

4-d. System End-User Help Desk Support

The initial contact for support of this application will be through the DIT Client Service Center.

Appendix B**System Description**

The purpose of this Application is to provide

System Priority

The priority of this system as compared to other systems required for the agency to be operational is defined as

I) Maintain Current System

The following Services are required by DIT to maintain System integrity and the current level of service:

I-a. Maintain Current Functionality

DIT will maintain the System functions in place as of the effective date of this SLA. This service ensures the correct operation of the System. DIT will notify the customer that a System change or System maintenance schedules are ready for implementation based upon the customer's time frame and/or appropriate scheduled system downtime.

Major Functional Activities:

- Provide functional support components provided by DIT staff.
- _____

System Scheduled downtime:

- Define appropriate lead time frames for DIT staff to notify agency for scheduled /required maintenance or upgrades.
- _____

Reports:

Not Included (N/I) DIT will provide reports required as defined within the agreed upon time frames.

Daily: (x)

- Report X provided daily by close of business to Agency business unit Y.

Weekly: (x)

- Report X provided weekly/biweekly by close of business on Z day to Agency business unit Y.

Appendix B

Monthly: (x)

- Report X provided monthly by close of business on Z day to Agency business unit Y.

Yearly: (x)

- Report X provided Yearly by close of business on Z day to Agency business unit Y.

1-b. Contingency Management and System Recovery

DIT is responsible for providing a backup and recovery method for this application based on the following customer requirements:

1-c. Problem Resolution

DIT will provide xx hour per day, xxx days per year downtime resolution; resolution of data integrity problems will be communicated by DIT to the Agency if any other deliverable will be affected.

Response time measure: define the time frame required for DIT to respond for problem resolution.

Downtime— definition of application downtime/unavailability

Report delivery— who is to be contacted within the Agency

System performance

1-d. Holiday Processing

DIT will make changes to enable the System to continue with current functions while adjusting to the Agency holiday work schedule.

1-e. Year Changes

Not Included (N I) - Any changes requested or required to the system must follow the normal development process.

1-f. Change Control

Not Included (N I) - Any changes requested or required to the system must follow the normal development change process.

Appendix B

2) Application Support Services

Application Development and Maintenance Services cover the entire application lifecycle from a total cost of ownership perspective.

This service offering also addresses the opportunity evaluations necessary to decide whether or not an application development project is warranted.

Application Support

2-a. Application Operations

DIT will provide System support for the current on-line and batch operations.

2-b. Historical Recurring Changes

Not Included (N/I) - Any changes requested or required to the system must follow the normal development process. This may include yearly archival of data to storage media.

3) Discretionary System Changes

3-a. Support for Customer Request

N/I

3-b. Technology Assessment

N/I

4) Other; System Services Specific to This System

4-a. Training

N/I This includes training provided by DIT to the Agency/ application users.

4-b. Data Entry Services

N/I This would include the data entry into databases.

4-d. System End-User Help Desk Support

The initial contact for support of this application will be through the DIT Help Desk. Define level of support required by DIT helpdesk to support the Agency.

State of Michigan, Department of Information Technology (DIT)

Service Level Definitions

7/3/03 Draft

1. Client Service Center

Service Definition

The Client Service Center (CSC) is designed to be a client's initial point of contact for information technology questions, requests and problem resolution. Clients may contact the Client Service Center by phone, fax or email at the following:

Phone at 241-9700 and 1-800-968-2644
 Email at DITService@michigan.gov
 FAX at 241 8439

Service Levels

The Center accepts calls M-F, 7:30 am – 5 pm. After hours urgent calls are transferred to the DIT Enterprise Help Desk. Service Center representatives are skilled in handling calls concerning

- Broken or inoperable desktop equipment
- Desktop software problems or questions
- Telephone or network problems or questions
- Requests for services provided by DIT, including procurement, installs, moves, adds or changes to desktops
- Agency application problems or questions

The priority assigned to any given problem will be on a three-tier scale - Urgent, High, and Medium and Low

- URGENT Issue / problem has potential to cause loss of life / risk of injury
- HIGH Directly Affects the Public or a large number of users are down
- MEDIUM All other problems or service requests with a deadline
- LOW All other problems or service request without a deadline

Performance Indicators

The Client Service Center will acknowledge, resolve or refer all requests received by phone, e-mail or fax within 15 minutes of initial contact. A resolved request would be one that the Client Service Center representative was able to handle to the Client's satisfaction. A referral would be a request that the Client Service Center representative handed off to the 2nd level support for resolution. The Client Service Center will be able to provide acknowledgement of a request by responding to the Client via e-mail when a remedy ticket was initiated and placed in work-in-progress status or referred to 2nd level support.

When 2nd level support is required, acknowledgement to the client of the ticket will occur within
 15 minutes for Urgent priority tickets
 20 minutes for High priority tickets

60 minutes for Medium priority tickets

2. Desktop Services

Service Definition

Desktop services encompasses all aspects of maintaining and supporting the desktop PC, including

- Desktop / laptop hardware and software problems
- Printers and other peripherals problems (for example, printers, DOMS, scanners, PDAs, external disk drives)

DIT purchases a standard set of desktops/laptops as defined in the State of Michigan's EUCN contract. These systems come with a manufacturer's on-site warranty for three years. Older equipment such as AST's or MAC's that are out of warranty is also supported by Desktop Services. All equipment failures are to be reported to the Client Service Center where they are tracked, diagnosed, and forwarded to Field Services staff for repair and / or replacement.

Service Levels

The DIT Desktop Services group provides support on all State of Michigan desktop and peripheral equipment. Support teams are strategically located throughout the State providing 5 x 9 coverage, accommodations for after hours support can be made on a case-by-case basis.

Performance Indicators

Repair/replacement of standard (currently Dell GX series) desktop / laptop / printer / peripheral hardware will be completed within 1 business day, if parts are required then 2 business days.

Standard, software (Rich would like some indication of what constitutes "standard" to be written here) problems will be resolved within 8 business hours.

DIT staff will make every effort to repair non-standard equipment in a timely manner.

3. Office Installation, Move, Add and Change (IMAC)

Service Definition

As a normal process of the workplace, organizations respond to business fluctuations by changing staff levels and relocating offices.

Desktop Moves

DIT provides services to assist in office relocations by moving desktops, LAN drops and, in selected locations, telephones. While DIT will assist in determining the electrical requirements for any proposed configuration, the client is responsible for facilitating all electrical requirements.

Service Levels

DIT will coordinate IMACs by assessing the size and complexity of the request before determining how the request will be processed. Generally, small IMACs can be completed in 2-4 business days. Larger IMACs that require coordination with other agencies, new equipment to be purchased and/or involve large numbers of devices will need to be incorporated in to a project that includes a agreed upon project plan, for DIT oversight and timely resolution. IMAC requests

will be referred to the agency(s) involved for authorization before initiation. Authorization will be obtained from the agency(s) through the appropriate DIT Dedicated Client Specialist.

Performance Indicators

It is the agencies responsibility to coordinate and provide electrical requirements.

Installation and moves of desktop equipment:

- 2 business days for 1 – 5 units, once the equipment is received
- 4 business days for 6 – 10 units, once the equipment is received
- Client and DIT will develop a project plan for moves more than 10 units. The Strategic Project Office (SPO) will be responsible for providing oversight for major projects.

4. Voice Services

Service Definition

DIT provides telephone service to approximately 20,000 employees in the Lansing, Detroit, Grand Rapids and Saginaw office complexes. For clients in outlying areas and for services other than standard telephone or voice mail services, DIT has negotiated a statewide contract with several Local Exchange and Long Distance Carriers for phone services. The service contracts provided by these carriers are managed by the DIT Telecom group. These contracts are available for agency use.

Service Levels

DIT Telecom managed voice telephone service is provided 7 x 24 x 365 without interruption. Service outages are a top priority.

- Installation and moves of office telephone equipment – State of Michigan provided service
 - 5 business days for 1 – 5 units
 - 10 business days for 6 – 10 units
 - Client and DIT will develop a project plan for more than 10 units. The SPO will be responsible for providing oversight for major projects.

Local Exchange and Long Distance Carrier services are provided according to the service levels within each contract.

- Installation and moves of standard office telephone equipment – Vendor provided service - according to contract provisions

Performance Indicators

DIT Provided Service

- Voice service is available 99.99%
- Major interruptions (such as dial tone disruptions) will be repaired within 4 business hours.
- Minor problems (such as noisy cord or headset) will be repaired within 1 business day.

Vendor Provided Service

DIT will provide Vendor Management of SBC and work to ensure the terms of the contract are met.

5. Procurement & Administrative Services

Service Definition

DIT Contracts and Procurement Services performs all IT computer commodity & service procurement for the State of Michigan, negotiates all IT related contractual services, and ensures that the services provided meet contract specifications. Many of the procurement activities are a component of other DIT Services.

Service Levels

DIT manages the entire spectrum of IT procurement, from standard desktop acquisition through complex ITB (invitation to bid) solutions.

Performance Indicators

Commodity desktop acquisitions

- Standard, (on hand inventory) completed in 2 business days
- Standard, purchased required, 2 – 6 weeks (end-to-end, includes procurement, vendor, Depot and Field Services time)
- Non-Standard Acquisitions will be negotiated with appropriate vendors and completed in a timely manner.

ITB Process

- | | |
|--|---------------------|
| • <u>Large projects (> \$1 M, high risk)</u> | <u>12-18 months</u> |
| • <u>Medium projects (\$250K - \$1 M, medium risk)</u> | <u>6-12 months</u> |
| • <u>Small projects (\$50K - \$250, low risk)</u> | <u>4- 6 months</u> |

Invoicing

- On Time
- Discrepancy Resolution within 30 days

6. Application Services

Service Definition

Agency Services is the liaison between the Department of Information Technology (DIT) and the individual Executive Branch agencies. This team is responsible for the development, modifications, and enhancements of agency IT applications. The development of new applications and major modifications to existing application will be coordinated with the agency by the Agency Services team. The Agency Services Team will engage the Strategic Project Office for assistance in managing major projects that have been approved by an Agency for implementation.

Agency Service's Enterprise Application Services is responsible for enterprise applications, including HRMN, MAIN, and the state web portal as well as middleware support and services for DIT. The development of new enterprise and/or multiple agency applications and major modifications to existing enterprise applications will be coordinated with the Enterprise Application Services team. The Enterprise Application Services team will engage the Strategic Project Office for assistance in managing major projects that have been approved by Agencies for implementation.

Service Levels

The Strategic Project Office (SPO) will be responsible for providing oversight for projects that are assigned to DIT. The SPO will provide periodic status reports as requested by the Agency Services Team or when the project fails to meet the required milestones or task timeframes.

Performance Indicators

The project will report on time, on Budget and within scope metrics based on the project plan.

7. Data & Application System Availability

Service Definition

DIT Agency Services provides the development and maintenance of application systems on various technologies and platforms. Currently, agency application support is performed by the same staff that was performing that function prior to the formation of DIT. This support staff now reports to the DIT agency IO. The Client Service Center will accept calls for application issues and then forward those calls to the appropriate agency support staff for resolution.

Agency application support and development will be the responsibility of the Agency IO and the support staff. System software and hardware support for mainframe and servers will be referred to Infrastructure Services for resolution. Data Center Operations is responsible for the support of the mainframes and servers installed at the Secondary Complex Data Center while Distributed Services is responsible for the support of servers housed in data centers outside of the Secondary Complex Data Center.

Agency Service's Enterprise Application Service is responsible for enterprise applications, including HRMN, MAIN, and the state web portal as well as middleware support and services for DIT.

Service Levels

Maintenance and support requirements for a specific application will depend on the associated Agency's need for availability and access to that application's functionality and data. Resolution times for reported problems and application up-time will also be determined by the Agency's customer's required access and the assigned priority level for the availability of the application's functions and data. Application availability will also be dependent on the availability of the application host, supporting network, desktop as well as other application dependencies such as a database.

Application enhancements and new applications requests will be assigned to the Agency Information Officer or Enterprise Application Services for resolution.

Performance Indicators

The Agency's customer will determine when the application must be available. The availability of an application may be required only during normal working hours of Monday thru Friday from 8am to 5 pm or if the application provides critical information to its users then it may need to be available 7x24x365. DIT will engineer new applications to provide 99% availability during the time specified for the Agency.

8. Center for Geographic Information

Service Definition

The Michigan Center for Geographic Information (CGI) provides leadership, technical expertise and policy for the development, use, dissemination, promotion and sharing of geographic information in the state of Michigan. The Center's mission will enable state government to more effectively and efficiently serve the citizens, businesses and other governments of the state in areas of public protection, homeland security, economic development, environmental protection and transportation.

Service Levels

The Center for Geographic Information will respond to requests for services that CGI provides.

Performance Indicators

The project will report on time, on budget and within scope metrics based on the project plan.

9. Web Site Portal (Michigan.gov)

Service Definition

The State's Internet services are coordinated through a single portal, www.michigan.gov providing a single external face to the web. Goals of Michigan.gov include

- Consistent web user interface (look and feel, usability) across individual agency applications and services
- Consistent security and privacy policies

DIT provides hosting services for production and test environments, support, and formal training in the michigan.gov tools, Vignette, Surfaid, and Inktomi.

Service Levels

The Michigan.gov portal is available 7 x 24 x 365. The e-Michigan Web Development group will respond to requests for services.

Performance Indicators

DIT will maintain 99% portal availability.

Client Service Level Reporting

<u>DIT Service</u>	<u>Measurement Description</u>	<u>Goal</u>
<u>Client Service Center</u>	<ul style="list-style-type: none"> <u>First Call Resolution</u> <u>Number of Cases</u> <u>Cases categorized by type; repair, service request and question.</u> 	First call resolution 70% time.

Glossary of Terms

-A-

Access Privileges	Physical and remote access to DIT facilities and resources granted by Enterprise Security.
-------------------	--

-B-

Business Resumption Plan (BRP)	The documentation that delineates for the Client and DIT the necessary procedures to successfully move the Client's applications from a production facility to the Disaster Recovery Site.
--------------------------------	--

-C-

Change Order	The process of documenting a change which is a deviation from an original request for the purposes of evaluation, approval or rejection, scheduling and tracking.
Client	The term by which DIT will refer to the State agencies that DIT supports, emphasizing the long-term service relationship.
Client Service Center (CSC)	An organizational unit that will manage all requests for clients. This is the initial point of contact for DIT service requests.

-D-

Dedicated Services	Those services which are utilized by a single agency.
Disaster Recovery Plan	The documentation that delineates all the roles and responsibilities for DIT staff, along with the steps that must be taken to successfully move the production processing performed at the DIT managed facilities to the Disaster Recovery site.

-E-

Enterprise Services	Those services which are utilized by multiple agencies.
Escalation	Engagement of increasingly higher levels of Management and technical resources to ensure problem resolution.
Ethical Hacking	Simulated hacking performed at the request of a Customer Agency, under the authority of Enterprise Security.

-N-

Normal Business Hours Notification	Fully staffed operational activity A communication to Management at predetermined times to provide awareness of a problem ticket that has been entered into the automated system.
------------------------------------	--

-S-

Service Level Agreement	A document which creates a shared understanding regarding the services provided.
Service Request (SR)	Any type of need from a client that is submitted to DIT, for example, break/fix, application support, upgrades, password resets, purchases, etc. Request for a change in an established process or procedure.
Status	Summary of problem resolution activities for a given ticket to Customers at specific points in time.
Service Providers	The phase in a system life cycle of the continuous performance of normal daily tasks.
System Availability	Total time system is available to agency, minus scheduled downtime.

System Description

Work Order/Preventative Maintenance

The purpose of this Application is to fill out and complete work orders for the maintenance department at the Grand Rapids Home for Veterans. Preventative Maintenance system schedules on going work for maintenance.

System Priority

The priority of this system as compared to other systems required for the agency to be operational is defined as high.

1) Maintain Current System

The following Services are required by DIT to maintain System integrity and the current level of service:

1-a. Maintain Current Functionality

DIT will maintain the System functions in place as of the effective date of this SLA. This service ensures the correct operation of the System. DIT will notify the customer that a System change or System maintenance schedules are ready for implementation based upon the customer's time frame and/or appropriate scheduled system downtime.

Major Functional Activities:

- Maintain the Access/Visual Basic database associated to this application.
-

System Scheduled downtime:

- Provide at least a 24 hour notice for scheduled or required maintenance.
- Notify agency at least 5 working days prior to any upgrades to the application or the Access databases.

Reports:

Not Included (N/I)

1-b. Contingency Management and System Recovery

DIT is responsible for providing a backup and recovery method for this application based on the following customer requirements:

- Backup database daily to include holidays and weekends.

Appendix B

1-c. Problem Resolution

DIT will provide 9 hours per day, 5 days per week downtime resolution; resolution of data integrity problems will be communicated by DIT to the Agency if any other deliverable will be affected.

Downtime-- application is down when work orders cannot be filled out or generated.
Unable to generate reports

Report delivery-- House Supervisor (616) 364-5365

System performance-- operational 95% of time. Must be able to generate work orders and print reports.

1-d. Holiday Processing

DIT will make changes to enable the System to continue with current functions while adjusting to the Agency holiday work schedule.

1-e. Year Changes

Any changes requested or required to the system must follow the normal development process.

1-f. Change Control

Any changes requested or required to the system must follow the normal development/change process.

2) Application Support Services

Application Development and Maintenance Services cover the entire application lifecycle from a total cost of ownership perspective.

This service offering also addresses the opportunity evaluations necessary to decide whether or not an application development project is warranted.

Application Support

2-a. Application Operations

DIT will provide System support for the current on line and batch operations.

2-b. Historical Recurring Changes

Not Included (N/I) - Any changes requested or required to the system must follow the normal development process. This may include yearly archival of data to storage media.

3) Discretionary System Changes

3-a. Support for Customer Request

Any changes must follow the normal development process.

3-b. Technology Assessment

Yearly assessment will be done in conjunction with Agency to ensure application is using current technology

4) Other: System Services Specific to This System

4-a. Training

An operating manual will be provided with maintenance staff and updated as application modifications occur.

4-b. Data Entry Services

N/I this would include the data entry into databases.

4-d. System End-User Help Desk Support

The initial contact for support of this application will be through the assigned Agency Services personnel.

System Description

Staff Development

The purpose of this Application is to maintain and provide mandatory training at the Grand Rapids Home for Veterans.

System Priority

The priority of this system as compared to other systems required for the agency to be operational is defined as high.

1) Maintain Current System

The following Services are required by DIT to maintain System integrity and the current level of service:

I-a. Maintain Current Functionality

DIT will maintain the System functions in place as of the effective date of this SLA. This service ensures the correct operation of the System. DIT will notify the customer that a System change or System maintenance schedules are ready for implementation based upon the customer's time frame and/or appropriate scheduled system downtime.

Major Functional Activities:

- Maintain the Access/Visual Basic database associated to this application.
-

System Scheduled downtime:

- Provide at least a 24 hour notice for scheduled or required maintenance.
- Notify agency at least 5 working days prior to any upgrades to the application or the Access databases.

Reports:

Not Included (N/I)

I-b. Contingency Management and System Recovery

DIT is responsible for providing a backup and recovery method for this application based on the following customer requirements:

- Backup database daily to include holidays and weekends.

Appendix B

1-c. Problem Resolution

DIT will provide 9 hours per day, 5 days per week downtime resolution; resolution of data integrity problems will be communicated by DIT to the Agency if any other deliverable will be affected.

Downtime— application is down when classes cannot be scheduled or maintained.

Report delivery— House Supervisor (616) 364-5365

System performance— operational 95% of time. Must be able to input data and generate reports.

1-d. Holiday Processing

DIT will make changes to enable the System to continue with current functions while adjusting to the Agency holiday work schedule.

1-e. Year Changes

Any changes requested or required to the system must follow the normal development process.

1-f. Change Control

Any changes requested or required to the system must follow the normal development/change process.

2) Application Support Services

Application Development and Maintenance Services cover the entire application lifecycle from a total cost of ownership perspective.

This service offering also addresses the opportunity evaluations necessary to decide whether or not an application development project is warranted.

Application Support

2-a. Application Operations

DIT will provide System support for the current on line and batch operations.

2-b. Historical Recurring Changes

Not Included (N/I) - Any changes requested or required to the system must follow the normal development process. This may include yearly archival of data to storage media.

3) Discretionary System Changes

3-a. Support for Customer Request

Any changes must follow the normal development process.

3-b. Technology Assessment

Yearly assessment will be done in conjunction with Agency to ensure application is using current technology

4) Other: System Services Specific to This System

4-a. Training

An operating manual will be provided with appropriate staff and updated as application modifications occur.

4-b. Data Entry Services

N/I this would include the data entry into databases.

4-d. System End User Help Desk Support

The initial contact for support of this application will be through the assigned Agency Services personnel.

System Description

Care Conference

The purpose of this Application is to notify family members for quarterly and annual care conferences at the Grand Rapids Home for Veterans.

System Priority

The priority of this system as compared to other systems required for the agency to be operational is defined as high.

1) Maintain Current System

The following Services are required by DIT to maintain System integrity and the current level of service:

1-a. Maintain Current Functionality

DIT will maintain the System functions in place as of the effective date of this SLA. This service ensures the correct operation of the System. DIT will notify the customer that a System change or System maintenance schedules are ready for implementation based upon the customer's time frame and/or appropriate scheduled system downtime.

Major Functional Activities:

- Maintain the Access/Visual Basic database associated to this application.
-

System Scheduled downtime:

- Provide at least a 24 hour notice for scheduled or required maintenance.
- Notify agency at least 5 working days prior to any upgrades to the application or the Access databases.

Reports:

Not Included (N/I)

1-b. Contingency Management and System Recovery

DIT is responsible for providing a backup and recovery method for this application based on the following customer requirements:

- Backup database daily to include holidays and weekends.

Appendix B

1-c. Problem Resolution

DIT will provide 9 hours per day, 5 days per week downtime resolution; resolution of data integrity problems will be communicated by DIT to the Agency if any other deliverable will be affected.

Downtime application is down when care conferences cannot be scheduled or unable to generate reports

Report delivery House Supervisor (616) 364-5365

System performance— operational 95% of time. Must be able to schedule care conferences and print reports.

1-d. Holiday Processing

DIT will make changes to enable the System to continue with current functions while adjusting to the Agency holiday work schedule.

1-e. Year Changes

Any changes requested or required to the system must follow the normal development process.

1-f. Change Control

Any changes requested or required to the system must follow the normal development/change process.

2) Application Support Services

Application Development and Maintenance Services cover the entire application lifecycle from a total cost of ownership perspective.

This service offering also addresses the opportunity evaluations necessary to decide whether or not an application development project is warranted.

Application Support

2-a. Application Operations

DIT will provide System support for the current on-line and batch operations.

2-b. Historical Recurring Changes

Not Included (N/I) - Any changes requested or required to the system must follow the normal development process. This may include yearly archival of data to storage media.

3) Discretionary System Changes

3-a. Support for Customer Request

Any changes must follow the normal development process.

3-b. Technology Assessment

Yearly assessment will be done in conjunction with Agency to ensure application is using current technology

4) Other: System Services Specific to This System

4-a. Training

An operating manual will be provided with appropriate staff and updated as application modifications occur.

4-b. Data Entry Services

N/I this would include the data entry into databases.

4-d. System End-User Help Desk Support

The initial contact for support of this application will be through the assigned Agency Services personnel.

System Description

Medicare

The purpose of this Application is electronic billing of Medicare-B claims. Provides a report of each claims submitted.

System Priority

The priority of this system as compared to other systems required for the agency to be operational is defined as medium.

1) Maintain Current System

The following Services are required by DIT to maintain System integrity and the current level of service:

1-a. Maintain Current Functionality

DIT will maintain the System functions in place as of the effective date of this SLA. This service ensures the correct operation of the System. DIT will notify the customer that a System change or System maintenance schedules are ready for implementation based upon the customer's time frame and/or appropriate scheduled system downtime.

Major Functional Activities:

- Maintain the SQL database associated to this application.

System Scheduled downtime:

- Provide at least a 24 hour notice for scheduled or required maintenance.
- Notify agency at least 5 working days prior to any upgrades to the application or the SQL databases.

Reports:

Not Included (N/I)

1-h. Contingency Management and System Recovery

DIT is responsible for providing a backup and recovery method for this application based on the following customer requirements:

- Backup database daily to include holidays and weekends.

1-c. Problem Resolution

DIT will provide 12 hours per day, 5 days per week downtime resolution; resolution of data integrity problems will be communicated by DIT to the Agency if any other deliverable will be affected.

Downtime application is down when the clerk is unable to enter member billing information.

Report delivery Linda Dillman (906) 226-3576 ext 304

System performance operational 95% of the time.

1-d. Holiday Processing

DIT will make changes to enable the System to continue with current functions while adjusting to the Agency holiday work schedule.

1-e. Year Changes

Any changes requested or required to the system must follow the normal development process.

1-f. Change Control

Any changes requested or required to the system must follow the normal development/change process.

2) Application Support Services

Application Development and Maintenance Services cover the entire application lifecycle from a total cost of ownership perspective.

This service offering also addresses the opportunity evaluations necessary to decide whether or not an application development project is warranted.

Application Support

2-a. Application Operations

DIT will provide System support for the current on-line and batch operations.

2-h. Historical Recurring Changes

Not Included (N/I) - Any changes requested or required to the system must follow the normal development process. This may include yearly archival of data to storage media.

3) Discretionary System Changes

3-a. Support for Customer Request

Any changes must follow the normal development process.

3-b. Technology Assessment

Yearly assessment will be done in conjunction with Agency to ensure application is using current technology

4) Other: System Services Specific to This System

4-a. Training

An operating manual will be provided at each nursing station and updated as application modifications occur.

4-b. Data Entry Services

N/I this would include the data entry into databases.

4-d. System End- User Help Desk Support

The initial contact for support of this application will be through assigned Agency Services personnel.

System Description

Medical Labs

The purpose of this Application is to automate the medical laboratory requests for members. Checks to verify proper ICD9 coding on each request and prints data on a formatted form for tests to be performed.

System Priority

The priority of this system as compared to other systems required for the agency to be operational is defined as high.

1) Maintain Current System

The following Services are required by DIT to maintain System integrity and the current level of service:

1-a. Maintain Current Functionality

DIT will maintain the System functions in place as of the effective date of this SLA. This service ensures the correct operation of the System. DIT will notify the customer that a System change or System maintenance schedules are ready for implementation based upon the customer's time frame and/or appropriate scheduled system downtime.

Major Functional Activities:

- Maintain the SQL database associated to this application.

System Scheduled downtime:

- Provide at least a 24 hour notice for scheduled or required maintenance.
- Notify agency at least 5 working days prior to any upgrades to the application or the SQL databases.

Reports:

Not Included (N/A)

1-b. Contingency Management and System Recovery

DIT is responsible for providing a backup and recovery method for this application based on the following customer requirements:

- Backup database daily to include holidays and weekends.

1-c. Problem Resolution

DIT will provide 12 hours per day, 5 days per week downtime resolution; resolution of data integrity problems will be communicated by DIT to the Agency if any other deliverable will be affected.

Downtime– application is down when nursing staff is unable to enter member lab requirements or unable to generate daily reports.

Report delivery– House Supervisor (906) 226-3576 ext 317

System performance– operational 95% of the time.

1-d. Holiday Processing

DIT will make changes to enable the System to continue with current functions while adjusting to the Agency holiday work schedule.

1-e. Year Changes

Any changes requested or required to the system must follow the normal development process.

1-f. Change Control

Any changes requested or required to the system must follow the normal development/change process.

2) Application Support Services

Application Development and Maintenance Services cover the entire application lifecycle from a total cost of ownership perspective.

This service offering also addresses the opportunity evaluations necessary to decide whether or not an application development project is warranted.

Application Support

2-a. Application Operations

DIT will provide System support for the current on line and batch operations.

2-b. Historical Recurring Changes

Not Included (N/I) - Any changes requested or required to the system must follow the normal development process. This may include yearly archival of data to storage media.

3) Discretionary System Changes

3-a. Support for Customer Request

Any changes must follow the normal development process.

3-b. Technology Assessment

Yearly assessment will be done in conjunction with Agency to ensure application is using current technology

4) Other: System Services Specific to This System

4-a. Training

An operating manual will be provided at each nursing station and updated as application modifications occur.

4-b. Data Entry Services

N/I this would include the data entry into databases.

4-d. System End-User Help Desk Support

The initial contact for support of this application will be through assigned Agency Services personnel.

System Description

Infection Control

The purpose of this Application is to provide listing of all employees and members TB tests. Program provides a report of all employees that haven't complied with testing. It provides report of all flu shots given.

System Priority

The priority of this system as compared to other systems required for the agency to be operational is defined as medium.

1) Maintain Current System

The following Services are required by DIT to maintain System integrity and the current level of service:

1-a. Maintain Current Functionality

DIT will maintain the System functions in place as of the effective date of this SLA. This service ensures the correct operation of the System. DIT will notify the customer that a System change or System maintenance schedules are ready for implementation based upon the customer's time frame and/or appropriate scheduled system downtime.

Major Functional Activities:

- Maintain the SQL database associated to this application.

System Scheduled downtime:

- Provide at least a 24 hour notice for scheduled or required maintenance.
- Notify agency at least 5 working days prior to any upgrades to the application or the SQL databases.

Reports:

Not Included (N/I)

1-b. Contingency Management and System Recovery

DIT is responsible for providing a backup and recovery method for this application based on the following customer requirements:

- Backup database daily to include holidays and weekends.

1-c. Problem Resolution

DIT will provide 12 hours per day, 5 days per week downtime resolution; resolution of data integrity problems will be communicated by DIT to the Agency if any other deliverable will be affected.

Downtime application is down when nursing staff is unable to enter employee and member data or unable to generate daily or monthly status reports.

Report delivery - Karla Bressette (906) 226-3576 ext 311

System performance operational 95% of the time.

1-d. Holiday Processing

DIT will make changes to enable the System to continue with current functions while adjusting to the Agency holiday work schedule.

1-e. Year Changes

Any changes requested or required to the system must follow the normal development process.

1-f. Change Control

Any changes requested or required to the system must follow the normal development/change process.

2) Application Support Services

Application Development and Maintenance Services cover the entire application lifecycle from a total cost of ownership perspective.

This service offering also addresses the opportunity evaluations necessary to decide whether or not an application development project is warranted.

Application Support

2-a. Application Operations

Appendix B

DIT will provide System support for the current on-line and batch operations.

2-b. Historical Recurring Changes

Not Included (N/I) - Any changes requested or required to the system must follow the normal development process. This may include yearly archival of data to storage media.

3) Discretionary System Changes

3-a. Support for Customer Request

Any changes must follow the normal development process.

3-b. Technology Assessment

4) Other: System Services Specific to This System

4-a. Training

An operating manual will be provided at each nursing station and updated as application modifications occur.

4-b. Data Entry Services

N/I this would include the data entry into databases.

4-d. System End-User Help Desk Support

The initial contact for support of this application will be through assigned Agency Services personnel.

System Description

Finance

The purpose of this Application is to automate the members banking operations at the home. Program tracks members' income and expenses on a monthly basis. Initiates the collection of room and board payments and tracks the actual cost of care. Provides monthly bank statements for each member, provides report of room and board payments, and numerous other reports used in the daily operation of the home.

System Priority

The priority of this system as compared to other systems required for the agency to be operational is defined as high.

1) Maintain Current System

The following Services are required by DIT to maintain System integrity and the current level of service:

1-a. Maintain Current Functionality

DIT will maintain the System functions in place as of the effective date of this SLA. This service ensures the correct operation of the System. DIT will notify the customer that a System change or System maintenance schedules are ready for implementation based upon the customer's time frame and/or appropriate scheduled system downtime.

Major Functional Activities:

- Maintain the SQL database associated to this application.

System Scheduled downtime:

- Provide at least a 24 hour notice for scheduled or required maintenance.
- Notify agency at least 5 working days prior to any upgrades to the application or the SQL databases.

Reports:

Not Included (N/I)

1-b. Contingency Management and System Recovery

DIT is responsible for providing a backup and recovery method for this application based on the following customer requirements:

- Backup database daily to include holidays and weekends.

1-c. Problem Resolution

DIT will provide 12 hours per day, 5 days per week downtime resolution; resolution of data integrity problems will be communicated by DIT to the Agency if any other deliverable will be affected.

Downtime application is down when staff accountants are not able to enter daily transactions or audit members' accounts.

Report delivery Lynne Verigin (906) 226-3576 ext 306

System performance operational 95% of the time. Must be able to print account information by 0800 on normal duty days.

1-d. Holiday Processing

DIT will make changes to enable the System to continue with current functions while adjusting to the Agency holiday work schedule.

1-e. Year Changes

Any changes requested or required to the system must follow the normal development process.

1-f. Change Control

Any changes requested or required to the system must follow the normal development/change process.

2) Application Support Services

Application Development and Maintenance Services cover the entire application lifecycle from a total cost of ownership perspective.

This service offering also addresses the opportunity evaluations necessary to decide whether or not an application development project is warranted.

Application Support

Appendix B

2-a. Application Operations

DDT will provide System support for the current on-line and batch operations.

2-b. Historical Recurring Changes

Not Included (N/I) - Any changes requested or required to the system must follow the normal development process. This may include yearly archival of data to storage media.

3) Discretionary System Changes

3-a. Support for Customer Request

Any changes must follow the normal development process.

3-b. Technology Assessment

Yearly assessment will be done in conjunction with Agency to ensure application is using current technology

4) Other: System Services Specific to This System

4-a. Training

An operating manual will be provided at each nursing station and updated as application modifications occur.

4-b. Data Entry Services

N/I this would include the data entry into databases.

4-d. System End-User Help Desk Support

The initial contact for support of this application will be through assigned Agency Services personnel.

System Description

Census

The purpose of this Application is to provide daily reports of member movements, admissions, discharges. Provides monthly report used for billing the VA

System Priority

The priority of this system as compared to other systems required for the agency to be operational is defined as high.

1) Maintain Current System

The following Services are required by DIT to maintain System integrity and the current level of service:

1-a. Maintain Current Functionality

DIT will maintain the System functions in place as of the effective date of this SLA. This service ensures the correct operation of the System. DIT will notify the customer that a System change or System maintenance schedules are ready for implementation based upon the customer's time frame and/or appropriate scheduled system downtime.

Major Functional Activities:

- Maintain the SQL database associated to this application.

System Scheduled downtime:

- Provide at least a 24 hour notice for scheduled or required maintenance.
- Notify agency at least 5 working days prior to any upgrades to the application or the SQL databases.

Reports:

Not Included (N/I)

1-b. Contingency Management and System Recovery

DIT is responsible for providing a backup and recovery method for this application based on the following customer requirements:

- Backup database daily to include holidays and weekends.

1-c. Problem Resolution

DIT will provide 12 hours per day, 5 days per week downtime resolution; resolution of data integrity problems will be communicated by DIT to the Agency if any other deliverable will be affected.

Downtime application is down when nursing staff is unable to enter member movements or unable to generate daily or monthly status reports

Report delivery Suc Feldhauser (906) 226-3576 ext 305

System performance operational 95% of the time.

1-d. Holiday Processing

DIT will make changes to enable the System to continue with current functions while adjusting to the Agency holiday work schedule.

1-e. Year Changes

Any changes requested or required to the system must follow the normal development process.

1-f. Change Control

Any changes requested or required to the system must follow the normal development/change process.

2) Application Support Services

Application Development and Maintenance Services cover the entire application lifecycle from a total cost of ownership perspective.

This service offering also addresses the opportunity evaluations necessary to decide whether or not an application development project is warranted.

Application Support

2-a. Application Operations

DIT will provide System support for the current on line and batch operations.

2-b. Historical Recurring Changes

Not Included (N/I) - Any changes requested or required to the system must follow the normal development process. This may include yearly archival of data to storage media.

3) Discretionary System Changes

3-a. Support for Customer Request

Any changes must follow the normal development process.

3-b. Technology Assessment

Yearly assessment will be done in conjunction with Agency to ensure application is using current technology

4) Other: System Services Specific to This System

4-a. Training

An operating manual will be provided at each nursing station and updated as application modifications occur.

4-b. Data Entry Services

N/I this would include the data entry into databases.

4-d. System End-User Help Desk Support

The initial contact for support of this application will be through assigned Agency Services personnel.

System Description

Appointments

The purpose of this Application is to track clinic and doctor appointments for members of the home. Provides daily reports to numerous departments of appointment times and locations.

System Priority

The priority of this system as compared to other systems required for the agency to be operational is defined as high.

1) Maintain Current System

The following Services are required by DIT to maintain System integrity and the current level of service:

1-a. Maintain Current Functionality

DIT will maintain the System functions in place as of the effective date of this SIA. This service ensures the correct operation of the System. DIT will notify the customer that a System change or System maintenance schedules are ready for implementation based upon the customer's time frame and/or appropriate scheduled system downtime.

Major Functional Activities:

- Maintain the SQL database associated to this application.

System Scheduled downtime:

- Provide at least a 24 hour notice for scheduled or required maintenance.
- Notify agency at least 5 working days prior to any upgrades to the application or the SQL databases.

Reports:

Not Included (N/I)

1-b. Contingency Management and System Recovery

DIT is responsible for providing a backup and recovery method for this application based on the following customer requirements:

- Backup database daily to include holidays and weekends.

Appendix B

1-c. Problem Resolution

DIT will provide 12 hours per day, 5 days per week downtime resolution; resolution of data integrity problems will be communicated by DIT to the Agency if any other deliverable will be affected.

Downtime application is down when nursing staff is unable to enter member appointments or unable to generate daily reports

Report delivery House Supervisor (906) 226-3576 ext 317

System performance– must be operational 95% of time. Must generate appointment report by 0630 each duty day.

1-d. Holiday Processing

DIT will make changes to enable the System to continue with current functions while adjusting to the Agency holiday work schedule.

1-e. Year Changes

Any changes requested or required to the system must follow the normal development process.

1-f. Change Control

Any changes requested or required to the system must follow the normal development/change process.

2) Application Support Services

Application Development and Maintenance Services cover the entire application lifecycle from a total cost of ownership perspective.

This service offering also addresses the opportunity evaluations necessary to decide whether or not an application development project is warranted.

Application Support

2-a. Application Operations

DIT will provide System support for the current on line and batch operations.

2-b. Historical Recurring Changes

Not Included (N/I) - Any changes requested or required to the system must follow the normal development process. This may include yearly archival of data to storage media.

3) Discretionary System Changes

3-a. Support for Customer Request

Any changes must follow the normal development process.

3-b. Technology Assessment

Yearly assessment will be done in conjunction with Agency to ensure application is using current technology

4) Other: System Services Specific to This System

4-a. Training

An operating manual will be provided at each nursing station and updated as application modifications occur.

4-b. Data Entry Services

N/I this would include the data entry into databases.

4-d. System End- User Help Desk Support

The initial contact for support of this application will be through assigned Agency Services personnel.

System Description

Time Clock

The purpose of this Application is electronic transfer of employee time from time clocks to DCDS. The program provides a report of each employee's time and provides call lists for overtime of all union employees.

System Priority

The priority of this system as compared to other systems required for the agency to be operational is defined as high.

1) Maintain Current System

The following Services are required by DIT to maintain System integrity and the current level of service:

1-a. Maintain Current Functionality

DIT will maintain the System functions in place as of the effective date of this SLA. This service ensures the correct operation of the System. DIT will notify the customer that a System change or System maintenance schedules are ready for implementation based upon the customer's time frame and/or appropriate scheduled system downtime.

Major Functional Activities:

- Maintain the SQL database associated to this application.

System Scheduled downtime:

- Provide at least a 24 hour notice for scheduled or required maintenance.
- Notify agency at least 5 working days prior to any upgrades to the application or the SQL databases.

Reports:

Not Included (N/I)

1-b. Contingency Management and System Recovery

DIT is responsible for providing a backup and recovery method for this application based on the following customer requirements:

- Backup database daily to include holidays and weekends.

1-c. Problem Resolution

DIT will provide 12 hours per day, 5 days per week downtime resolution; resolution of data integrity problems will be communicated by DIT to the Agency if any other deliverable will be affected.

Downtime application is down when supervisors are unable to access their employees' time clock punches or the house supervisor is unable to generate an overtime list.

Report delivery House Supervisor (906) 226-3576 ext 317

System performance Operational 95% of time

1-d. Holiday Processing

DIT will make changes to enable the System to continue with current functions while adjusting to the Agency holiday work schedule.

1-e. Year Changes

Any changes requested or required to the system must follow the normal development process.

1-f. Change Control

Any changes requested or required to the system must follow the normal development/change process.

2) Application Support Services

Application Development and Maintenance Services cover the entire application lifecycle from a total cost of ownership perspective.

This service offering also addresses the opportunity evaluations necessary to decide whether or not an application development project is warranted.

Application Support

2-a. Application Operations

Project Feasibility Document

A. General Information

Information to be provided in this section is general in nature and provides the necessary information about the organization of the proposed project and project participants.

Project Name: _____ **Date:** _____
Controlling Agency: _____ **Modification Date:** _____
Prepared by: _____ **Authorized by:** _____

B. Business Problem:

Information in this section discusses the reasons the Project Feasibility Document has been created and what the project is intended to accomplish.

Current Situation: _____
Provide a brief description of the current situation.

Factors or Problems: _____
This statement should be a short synopsis of the relevant factors, or problems, being faced by the functional area(s).

Areas Impacted: _____
This should be a brief statement regarding other areas impacted.

Resolution Date: _____
Determine, as accurately as possible, a resolution date to the problem.

C. Approach Overview:

This section is used to list elements that will determine the course that the proposed project will take.

D. Potential Solutions:

Information in this section discusses the potential solutions to the problem in the Project Feasibility Document.

Solution 1:	
Description	_____
Resources	_____
Cost/Benefit	_____
Payback/Return	_____

<i>on Investment Schedule</i>	
<i>Implementation Considerations</i>	
<i>Reasons to Abandon</i>	

Solution 2:

<i>Description</i>	
<i>Resources</i>	
<i>Cost/Benefit</i>	
<i>Payback/Return on Investment Schedule</i>	
<i>Implementation Considerations</i>	
<i>Reasons to Abandon</i>	

Solution 3:

<i>Description</i>	
<i>Resources</i>	
<i>Cost/Benefit</i>	
<i>Payback/Return on Investment Schedule</i>	
<i>Implementation Considerations</i>	
<i>Reasons to Abandon</i>	

E. Preliminary Recommendations:

This section reviews the preliminary recommendation based upon the areas impacted by this recommendation or the operational protocol.

Recommended solution:

--

Recommended justification:

--

F. Signatures:

This section is for approval signatures by the project team members, sponsors, stakeholders, and management.

Project Scope Statement

A. General Information

Information to be provided in this section gives a specific name to the project as well as pertinent information about the personnel involved.

Project Name: _____	Date: _____
Controlling Agency: _____	Modification Date: _____
Prepared by: _____	Authorized by: _____

B. Project Results/Completion Criteria

State what will be created in terms of deliverables (and their characteristics) and/or what constitutes a successful phase completion.

C. The Approach to be Used

State in sufficient detail, what type of approach will be used to manage scope changes. State whether the project be done internally or require "outside" assistance.

D. Content of the Project

Define what work is to be done. Include relevant business requirements.

E. Exclusions

Define what work is not to be done. Include relevant business requirements.

State of Michigan
(Insert Agency Name Here)
Project Charter

A. General Information

Information to be provided in this section gives a specific name to the project as well as pertinent information about the personnel involved.

Project Name: _____ **Date:** _____
Controlling Agency: _____ **Modification Date:** _____
Prepared by: _____ **Authorized by:** _____

B. Project Purpose

This section communicates the purpose of the project and the charter that is being established.

--

C. Project Objective

This section defines the objectives of the project as they relate to the goals and objectives of the organization. Note: Projects are full of uncertainty. As such, it is advisable, as part of this charter, to develop an initial risk assessment to identify, quantify, and establish mitigation responses to high level risk events that could adversely affect the outcome of the project.

The Project will support the following organization strategic goals. For each goal, project objectives are identified. The project plan developed as a result of this project charter will:

- *Develop a project performance measurement plan to measure performance against these objectives.*
- *Provide a project performance report to document the results.*

The external oversight committee must approve the project performance measurement plan.

Agency Goals	Project Objectives

D. Project Scope

The level of detail in this section must be sufficient to allow for detailed scope development in the Project Plan. A more detailed description of the project scope will be developed in the Planning Phase. The reader is cautioned that scope creep (adding work without corresponding updates to cost, schedule, and quality) may render original plans unachievable. Therefore, initial clarification of scope, and adherence to the plan throughout the project, are of the utmost importance. Describe any applicable assumptions and/or constraints that may affect the project.

--

E. Project Authority

This section describes the authority of the individual or organization initiating the project, limitations or initial checkpoint of the authorization, management oversight over the project, and the authority of the Project Manager. This project charter defines two management structures—internal and external—to ensure change and issues affecting project completion are properly controlled.

• Authorization

This section ensures that the project initiator has the authority to commit the appropriate resources within the organization.

This Project Charter has been initiated by Initiating Organization and authorizes the expenditure of Organization resources to complete a first checkpoint for the Project.

• Project Manager

This section explicitly names the project manager and may define his or her role and responsibility over the project. This section also lists the project manager's skill sets and justifies his or her selection for this project. Depending on the [Project] complexities, this section may describe how the project manager will control matrix organizations and employees.

Identify the Project Manager, their expressed authority, their skill set, and justification for why they were selected to lead the project.

• Oversight (Steering) Committee

This section describes agency management control over the project. Within the project, internal control should be established to control the day to day activities of the project. The project manager should manage internal control. External oversight should be established to ensure that the organization's resources are applied to meet the project and organization's objectives.

List Oversight Committee members and contact information.

• Controls

This section should describe or reference a process by which internal and external controls interact. Diagrams should be used where appropriate.

F. Roles and Responsibilities

This section discusses the overall structure of the project organization and its roles and responsibilities throughout the project phases. Note: As an addendum to this sub-section, it may be advisable to develop a responsibility matrix. The matrix lays out the major activities in the project and the key stakeholder groups. It also provides a good example of showing cross-functional/organizational interaction.

• Project Organization Overview

This section describes key organizations or individuals supporting the project not directly under the authority of the project manager. A responsibility matrix may facilitate the task of organizing and assigning resource responsibility.

Major Milestones	Functional Roles							

[illegible]

Legend:

E = responsible for execution (may be shared)

A = final approval for authority

C = must be consulted

1 – must be informed

G. Management Checkpoints

This section describes key management checkpoints established by the initiating agency.

Checkpoint	Evaluation Criteria

H. Signatures

The signatures of the people below relay an understanding in the purpose and content of this document by those signing it. By signing this document you agree to this as the formal Charter statement to begin work on the project described within, and commitment of the necessary resources.

Name/Title		Signature		Date
